

DAILY PHYSICAL ACTIVITY

The Board recognizes the developmentally appropriate daily physical activity, exercise and physical education are ways to minimize health risks created by chronic inactivity, childhood obesity, and other related health problems. The Board encourages students and staff to participate in developmentally appropriate physical activity and exercise at least 30 to 60 minutes each day as a way to minimize these health risks. The Board encourages the following practices:

1. Encourage parents/guardians to support their children's participation in enjoyable physical activities and recognize that parents/guardians act as role models for active lifestyles.
2. Support special programs such as student and staff walking programs, family fitness events, and events that emphasize lifelong physical activity.
3. Integrate health and physical activity across the school curriculum.
4. Encourage student-initiated activities that promote inclusive physical activity on a school wide basis.
5. Establish relationships with community recreation and youth sports programs and agencies to coordinate and complement physical activity programs.
6. Encourage physical activity recess periods.
7. Commit adequate resources that include program funding, personnel, safe equipment, and facilities;
8. Students are expected to go outside for daily recess, weather permitting, with "real feel" being 15 degrees and above.
